concept

—

With ever increasing demands for products to become lighter, faster, smaller, more intuitive and interface with us as human beings, materials are having to become more multifunctional, being able to perform more than one task. Mono-lights by OS Δ OOS takes on this task and presents a methodology where one material combines multi-functionality with a clear monolithic aesthetic. The Mono-lights are an extension of the uni-body fluorescent tubes, updated with the latest technology in the field of LED lighting. The structural elements have become an extension of the tubes themselves, with the added function of being completely flexible; yielding themselves to the possibilities of being bent and contorted to fix into any situation.

Specifications

Mono-Lights is to be installed in a large variety of possibilities. Due to its flexibility the light can be placed anywhere. Hanging from the ceiling, from the wall, multiple lights can be attached to each other.

size

ceiling mount

Carrara marble foot

€ 49,- incl. btw

€ 40,80 / € 8,50 btw

only included with
Mono 3, Mono 4 and Mono 5

The following pages show possible combinations with the same light installed in different ways.

Moving from the floor to the wall

Hanging from the ceiling

—

When lowering the light, the foam creates a bend. Reposition the marble weight and the light will stay in its position.

Changing the light direction

—

The direction of the light can be adjusted by turning the TL tube.

From horizontal to vertical

—

With a small element on
the wall the light can be
easily installed vertically.
